August 2012

Dedicate and Save with Multicyl!

Tool changeover. Set-up time. Press availability. Skilled labor needed to change, set up, and maintain tools. Stocking product inventory. Work in progress. The list goes on.

These are all issues the busy manufacturing company has to deal with to meet production demands. However, you can use Multicyl to help alleviate the burden - and save money in both capital and production cost - by using dedicated presses.

The compact, easy to use, and inexpensive Multicyl packages can allow you to leave your custom die sets in a dedicated manufacturing cell ready to use any time - with no set up time.

Take a look at some recent projects in which we helped our customers dedicate and save money:

Call us for a solution to your costly and labor intensive tool set up problems!

FREE Tonnage Calculator

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
