#### Multicyl - A Different Approach

In this newsletter we usually feature a single case study, Multicyl application, or feature. Today we are going to take an approach which is a little different: we are going to look at the full Multicyl spectrum. We have put together a short promotional video which highlights our product range and shows a wide variety of Multicyl applications used across industry. If you are in manufacturing (and if you are receiving this newsletter you probably are!), please take a minute to watch this video - it will be worth your while.

Multicyl Promotional Video

Watch for our next newsletter soon which will highlight another case study in which the Multicyl and unitized tooling combination produced an excellent machine.

**FREE  
Tonnage  
Calculator**

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
