Introducing our new Multicyl MC series HZ punching unit!

This is the newest addition to the family of unitized tooling punching applications that Multicyl products provide solutions for.

Combining our standard MC series Multicyl, our HZ frame (which also fits standard A series units), and the HZ unit from Unipunch we have another option for punching edges of tubing, angle iron, roll formed parts, and extrusions.

Click the picture below to see this [unit in action](#).

For a quote on your custom requirement [contact us!](#)

To learn more about Multicyl products visit our website at www.multicyl.com

Use our [Tonnage Calculator](#) to determine your force requirements.

FREE Tonnage Calculator

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
