January 2013

Happy New Year from everyone at Multicyl!

We are going to take the start of the New Year as an opportunity to remind ourselves about what the foundation of our company is.

While we are able to offer our customers a variety of products and solutions to their manufacturing needs, and have done so now for 30 years, the backbone of all of them is the same: the Multicyl.

It really is an amazing product; our MC 12-5-4, for example, is only 3-3/4" in diameter and weighs a mere 20 pounds - yet it produces up to 6 TONS. Our XL 25-5-9 weighs only 40 pounds - yet it produces up to 12-1/2 TONS. All of this from just SHOP AIR and with cylinder prices starting at just \$1,425.00 (list price of our MC 12-5-4) Multicyl offers the best bang for your punching buck.

Multicyl has been "punching above our weight" for 30 years!

Multicyl: Boxed in Canada but *punching all over the world!*

**Multicyl
MC 12-5-4**

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our [tonnage calculator](#) select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
