[Punching Basics Guide](#)

November 2012

The world's economy has been on a wild ride lately but here in Canada we are more than weathering the storm.

"Cautious but optimistic" best describes the Bank of Canada's outlook towards future growth: 2.2% growth is expected this year with slight increases expected in each of the next 2 years. [Click here](#) to see the report as provided by TD Economics_____

These guys may not be punching right now, but we still are!

Here at Multicyl we are doing our part (we can't afford to take time off like the NHL!), finishing off 2012 on a high note with several excellent projects for both Canadian and worldwide customers.

We have added pictures of some of our recent jobs to our picture gallery - check it out [here](#) to get some ideas on how we can help you - the CANADIAN manufacturer! _____

Multicyl: Boxed in Canada but punching all over the world!

Use our **Tonnage Calculator** to determine your force

requirements.

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
