[Press Selection Tool](#)

[Punching Basics Guide](#)

October 2012

Unitized tooling is still one of the most common types of tooling used in industry, and for good reason; there are lots of benefits they bring to the table for manufacturers and fabricators - they are cost effective, efficient, and reliable production tools.

Multicyl is an excellent power source for all types of unitized tooling and applications. Whether you need a complete punching solution, or could benefit from freeing up a press, Multicyl can help you - our **product line** offers something to suit all standard unitized tools.

To find out more about [how we can help you please visit our new unitized tooling page.](#)

[Our staff is well versed](#) in all standard unitized tooling product lines and our team can put together the best package for your application. If you have questions about an application contact us - we can help!

Use our [Tonnage Calculator](#) to determine

your force requirements.

**FREE
Tonnage
Calculator**

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
