August 2014

Dear Karen,

Shown below is a recent custom tube piercing machine by Multicyl. With an easy load, cycle, and unload operation sequence, a safe and simple changeover procedure, and a sleek and simple machine concept Multicyl has once again shown why it is a leader in custom tube piercing applications.

This machine pierces a formed tube in 4 locations with a single machine cycle, with the defining feature being the quick and safe adjustment for different length tubes.

The set up time is minimal and the changeover is safe for even non-technical personnel as the Multicyl stations themselves move and the operator does not have to reach into a press to perform the changeover.

Click the picture below to see the machine in operation:

FREE Tonnage Calculator

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
