[Punching Basics Guide](#)

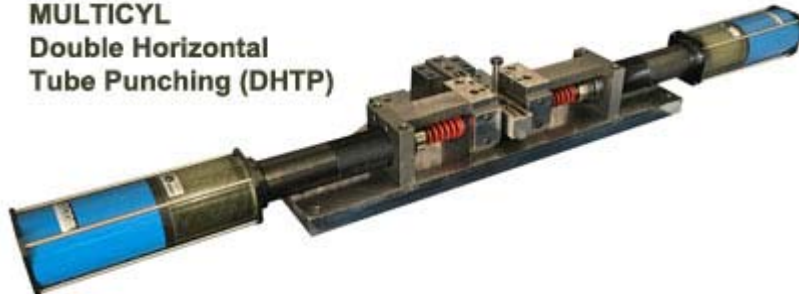

April 2016

Double Horizontal Tube Punching (DHTP) has been a staple Multicyl application for many years. Of course we are always trying to improve our solutions to bring added value to our customers and to make their manufacturing processes **easier** and more **productive**.

Some of the **new innovations** we have added to our DHTP stations include a **quick punch** and **mandrel change** as well as some added **versatility** features.

Click on the picture below to see a video of the unit in action which highlights some of the new features.

**MULTICYL
Double Horizontal
Tube Punching (DHTP)**

Make sure you check out our new website at www.multicyl.com

To learn more about Multicyl products visit our website at www.multicyl.com

**FREE
Tonnage
Calculator**

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our tonnage calculator select either the hole diameter or shear length option.

Then select your material or fill in the tensile strength of the material you are using (KSI). Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
