[Punching Basics Guide](#)

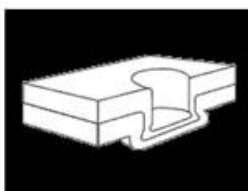

August 2016

At Multicyl we are well known for our industry standard in **bench top press solutions** using our Multicyl cylinders with modular tooling like the Unipunch system.

We have recently developed a **new innovation** expanding our capabilities - we have combined our MultiLoc metal joining technology using the patented BTM clinch tooling with the Unipunch tooling system.

Our customers can now **use a single Multicyl system and Unipunch tool holder for both hole punching and metal joining** using standard interchangeable tooling components.

For a quote on this application or any other Multicyl product please email or call us at the numbers below.

MultiLoc Tog-L-Loc joint<sup>®</sup> cross section

MultiLoc Reg. U.S. Pat. & Tm. Off.  
joint cross section

Make sure you check out our new website at [www.multicyl.com](http://www.multicyl.com)

### FREE Tonnage Calculator

Use our [Tonnage Calculator](#) to determine your force requirements.

To use our tonnage calculator select either the hole diameter or shear length option. Then select your material or fill in the tensile strength of the material you are using (KSI).

Fill in the rest of the data and hit calculate. You will be given the tonnage requirement and a list of potential Multicyl cylinders for the application.
